

Bring your class to Explorit

Discovery Lessons. Students engage in the hands-on activities and exhibitions in our gallery. An Explorit educator introduces the current topics.

Inquiry Labs. Students explore team challenges tied to themes of Electricity, Light & Sound, States of Matter, or Gravity.

Nature Safaris. Students discover the wonders of Mace Ranch Park armed with nets, shovels, "bug suckers," and guidebooks.

Family Science Nights

Turn your multipurpose room into an interactive science museum for the entire family:

Green World, Healthy People lets families explore the human body, fitness, environmental stewardship, and more through interactive experiments.

Science in Your World offers interdisciplinary science for all, from math puzzles to the microscopic world to static electricity.

Explorit comes to your school

Classroom Adventures. An Explorit educator facilitates a hands-on science investigation in the classroom. Book up to four 60-minute sessions of a single topic in one day.

Choose from eight topics:

Amazing Animals (K-4) Investigate animal traits, characteristics, and adaptations with specimens and live animals.

Simple Machines (K-4) Explore the six main types of simple machines while experimenting with the forces of motion.

Light & Sound (1-5) Discover waves--see the sound waves of your voice or use vibrations to move objects.

Earth's Features (2-6) Explore the forces and characteristics of volcanoes, earthquakes, rocks, and mineral forms.

Explorations in Energy (3-6) Experiment with energy sources and how they can be converted into heat, light, and motion.

Nano World (4-6) Investigate the nano technology in nature, health, biology, energy, and the environment.

Hidden World (3-6) Discover the tiny pictures on coins and the miniscule animals living in a drop of pond water. Through the lens of a microscope, there's much to explore.

Neighborhood Ecosystems (K-6) Explore the soil, plants, and animals in the schoolyard ecosystem.

Explorit Science Center's facility in the Mace Ranch Park inspires thousands of students a year with hands-on science field trips.

Many schools book a combination of programs for a field trip their students will long remember.

2016-2017
(Beginning July 1, 2016)
**Program
Details**

Bring your class to *Explorit*

- Discovery Lessons
- Inquiry Labs
- Nature Safaris

Length:
75 minutes

Group Size:
Up to 40 students. At least 1 adult per 7 students must accompany the group.

Availability:
Monday-Friday,
Between 9:00am to 2:00pm

Program Fee:
\$6.00 per student. Teachers and adult chaperones are free. \$72 minimum per group.

Explorit comes to your school

**Classroom
Adventure**
Length:
60 minutes
Group Size:

Up to 40 children. Teacher participation plus 2-4 adult chaperones required. Additional charges apply for groups over 40 students.

Availability:
Weekdays, up to 4 sessions per day, some restrictions apply.

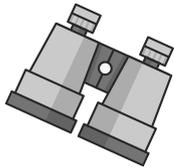

Program/Travel Fees:
Collaborate with other teachers to book more sessions and save!

Pricing:

- 4 sessions = \$520 (\$130.50 per session*), plus 99 cents per round-trip mile to your site.
- 3 sessions = \$435 (\$145 per session*), plus 99 cents per round-trip mile to your site.
- 2 sessions = \$326 (\$163 per session*), plus 99 cents per round-trip mile to your site.
- 1 session = \$182, plus 99 cents per round-trip mile to your site.

*Reduced prices apply only for same topic, same site, same day programs.

Family Science Nights

- Green World, Healthy People
- Science in Your World

Length:
90 minutes

Group Size:
Up to 600 children and adults

Availability:
Weeknights, 6:30-8:00pm.
Other days and times are available by special arrangement.

Program/Travel Fees:
\$900, plus 99 cents per round trip mile to your site.

Special Discount

Reservations made **for programs delivered by December 31, 2016** receive a 10% discount. If your school has never had a program from *Explorit*, receive a 10% discount. If both conditions apply, receive a 20% discount!
